Not positively prepared - i.e. the strategy will not meet development needs

Not justified - i.e. there is no evidence to justify the modification

Not effective - i.e. it won't work

Not consistent with national policy - i.e. does not comply with the law

Question 10.

Reason for SUPPORT or OBJECTION:

Please give details to explain why you support or object to the wording of the Modification(s) or part(s) of the Sustainability Appraisal of the Main Modifications.

You must provide an answer to this question.

I totally agree the reason Roy suggested: this field is in the functional flood plain of the River Cherwell, it is important for holding back flood water from downstream areas, such as central Oxford. The field has been under standing water for much of the last few months. It is a daft place to suggest new building. It is also a well loved recreational area and development will undermine its tranquility and biodiversity. It is also a very important wetland which has multiple functions including water purification for River Cherwell, nutrients processing and support of local plants and animals. Lots of researches has been done for the importance of wetland in cities.

And also, we choose to live in this area is because it is a beautiful quiet area with no busy through drive way to the main road. It is acceptable to build several houses to release the shortage of housing in Oxford. But the plan of 10,000 new house to our very quiet community is too ambitious.

Instead of plan that many of new houses in that area, a better choice is to plan an eco-park in that flooding area with some well-planed houses. But if council don't have money for the better plan, just leave the wetland to River Cherwell who occupied this field for thousands of years.

Question 11.

Summary of Representation:

If your reason for support or objection is longer than 100 words, please summarise the main issues raised.

This field is very important for the environment.

It is also important to keep Marston a quiet community.
