OLP2040 Site assessment proforma (including Sustainability Appraisal)

Site name	Redbridge Paddock	Site location plan
HELAA	113	
reference (and OLP2036 Policy if applicable)	Policy SP29	Sacy Cold Harbour
Ward	Hinksey Park	Weirs Mill Stream
Site size	3.64 ha	
Existing use	Agricultural land	Whem By PlaceRd River Isl Contains QS data © Crown Copyright and database right 2020

Stage 1 assessment – are there any clear conflicts with national planning policy and/or any insurmountable environmental or physical constraints?

Assessment criteria	Outcome	Comments
Is the site an SAC or SSSI?	No	
Is the site greenfield in flood	Yes	Small amount (1%) of site lies
zone 3b?		within Flood Zone 3b
Is the site area less than	No	
0.25ha?		
Is the site already at an	No	
advanced stage in the planning		
process (development		
commenced)?		

Stage 1 conclusion

No clear conflicts with national policy or insurmountable environmental or physical constraints. Continue to Stage 2 assessment.

Stage 2 assessment – Qualitative assessment of deliverability (incorporating Sustainability Appraisal)

SA Objective 1: To achieve the city's ambition to reach net zero carbon emissions by 2040. *See SA Objective 8 for decision-making criteria*

SA Objective	SA Objective 2: To build resilience to climate change, including reducing risks from overheating, flooding and the resulting detriment to well-being, the economy and the environment.	
Decision-	Is the use p	roposed suitable given the flood zone of the site?
making criteria		
	SA rating	Comments
What flood		Site is partially within Flood Zone 3b
zone is the site		(1% of site lies within Flood Zone 3a and 3b)
in		(3% of site lies within Flood Zone 2)
		Only the southern corner and a very small portion towards the north of the site lie within Flood Zone 3b.
Flooding of land	0	There is safe access/egress from the site from Abingdon Road, the
surrounding site		majority of which lies in Flood Zone 1.
for access/		
egress		

SA Objective	SA Objective 3: To encourage the efficient use of land through good design and		
	layout, and	layout, and minimise the use of greenfield and Green Belt land	
Decision-making	Will the site make use of previously developed land/ buildings?		
criteria	Will the site be on Green Belt land?		
	SA rating	Comments	
Previously	-	Site is meadowland used for grazing (unprotected open space)	
developed land			
Green Belt	0	Site not in the green belt.	

SA Objective	SA Objective 4: To meet local housing needs by ensuring that everyone has the	
	opportunit	y to live in a decent affordable home
Decision-making	Will the site	e provide significant quantities of net new housing?
criteria	Will it impr	ove the availability of decent affordable housing?
	SA rating	Comments
Housing	++	Site allocated for 200 homes and residential moorings
provision		
Affordable	+	Site expected to deliver policy compliant levels of affordable housing
housing		(40%).
provision		

SA Objective	SA Objective 5: To reduce poverty, social exclusion, and health inequalities	
Decision-making	Will it improve opportunities for people in the most deprived areas?	
criteria		
	SA rating	Comments
Regeneration	0	Site outside regeneration area
areas		

SA Objective	SA Objective 6: To provide accessible essential services and facilities	
Decision-making	Will it increase the provision of essential services and facilities?	
criteria		
	SA rating	Comments
Community	0	
facilities		

See also SA Objective 8

SA Objective	SA Objective 7: To provide adequate green and blue infrastructure, leisure and recreation opportunities and make these readily accessible for all; and to conserve and enhance Oxford's biodiversity	
Decision-making	Will it increase the provision of public open space?	
criteria		t and enhance existing flora, fauna and habitats?
	SA rating	Comments
Public open	+	10% POS will be provided within the site
space		
Ecology and	0	Within 50m of the Iffley Meadows SSSI
biodiversity		
		It is not subject to any designations for its wildlife value; however,
		the land opposite the River Thames forms part of the Iffley
		Meadows Site of Special Scientific Interest (SSSI). The potential for
		any proposed development to directly or indirectly impact the SSSI must be assessed.
		Aerial imagery indicates Redbridge Paddock is dominated by grassland with areas of scattered scrub and potentially a woodland belt along the eastern boundary. Numerous tree lines are present. Iffley Meadows SSSI is notified for its alluvial flood meadows containing a rich grassland flora. It should be a priority to establish the distinctiveness and condition of the grassland within the allocation site to understand the extent of constraint this provides to potential development.
		Potential protected species constraints include roosting bats, foraging and commuting bats, badger, water vole, otter, breeding birds, reptiles, and invertebrates.

In addition, the River Thames is likely to be an important foraging and commuting resource for bats and should not be subject to any artificial illumination as a result of any proposed development. A lighting strategy should be submitted in support of any planning application, setting out the lighting associated with the proposed development. Given the proximity of the proposed development, this will need to account for both internal and external lighting. It is vital that a suitable buffer in terms of size and composition is provided to the River Thames and Iffley Meadows SSSI. This should include retaining the existing tree-line / woodland belt and delivering high quality habitats within the river corridor.

If existing trees are removed new trees should be planted to fully mitigate the impact on tree canopy cover green infrastructure in the area. New tree planting should be appropriate to ensure that the predicted tree canopy cover (% site area) following development (25 years) delivers policy and GI TAN expectations i.e. at least no net loss. Opportunities exist to plant new trees to improve connectivity within GI network.

SA Objective Decision-making	SA objective 8: To reduce traffic and associated air pollution by improving travel choice, shortening journeys and reducing the need to travel by car/ lorry (also SA objective 1: To achieve the city's ambition to reach net zero carbon emissions by 2040) Will it encourage walking cycling and use of public transport?	
criteria		vithin an Air Quality Management Area?
	SA rating	Comments
Sustainable	+	Less than 100m way there are regular bus services on the Abingdon
transport links		Road and from the Park and Ride opposite the site
(bus stop)		
Sustainable	-	Oxford railway station is over 20 minutes walk (3500m)
transport links		
(rail station)		
Primary schools	-	The nearest school is 1200m away
Secondary	-	The nearest school is 2500m away
schools		
GP surgeries	-	The nearest GP surgery is 1700m away
Post office	-	The nearest post office surgery is 1700m away
Air quality		City lies within a AQMA

SA Objective	SA Objective 9: To achieve water quality targets and manage water resources
Decision-making	Does the site contain, or is it near, a water body?
criteria	

	SA rating	Comments
Water	-	Weirs Mill Stream, tributary of the Thames runs along the eastern
		edge of the site

SA Objective	SA Objective 10: To promote good urban design through the protection and enhancement of the historic environment and heritage assets while respecting local character and context and promoting innovation.	
Decision-making criteria	Does the site contain any historical, or archaeological features?	
	SA rating	Comments
Archaeology	-	Potential for Normal/ medieval archaeological remains.
Conservation	0	Site not within a conservation area or RPG
Areas & Register		
of Parks and		
Gardens (RPG		
Listed Buildings	0	Site does not contain any listed buildings
View Cones	0	Site not within view cone
High Buildings	0	Site outside the city's locally designated high buildings area.
Area		

SA Objective	SA Objective 11: To achieve sustainable inclusive economic growth, including					
	the development and expansion of a diverse and knowledge-based economy					
	and the	culture/leisure/ visitor sector				
Decision-making	Will it su	Will it support key sectors that drive economic growth?				
criteria	Will it in	Will it increase the quantity and quality of employment opportunities?				
	SA	Comments				
	rating					
Support the	0	Unlikely to support additional jobs in the knowledge economy				
knowledge-based						
economy						
Support	0	No change				
diversification or						
affordable						
workspace						

Other constraints which could affect suitability of site for development		
Can access for vehicles be achieved?	Vehicular access to the site would be from Abingdon Road and may require either a connection into the existing signalised junction from Abingdon Road/Old Abingdon Road or a connection into the existing traffic signals for buses accessing the Redbridge P & R site opposite	
Can walking and cycling connections with the	Yes two points of access would be required for pedestrians and cyclists: one to the west connecting with the bus stops at the P & R site and the	

surrounding area be achieved? Does the site include any significant physical features such as trees, rivers/streams or changes in ground level?	other to the north connecting with existing bus stops on Abingdon road, The existing cycle track which runs along the western boundary should be retained. Weir Mill stream forms the eastern boundary to the site, the site is comprised of made up ground being a former landfill site. Site contains significant existing trees along the river bank which are important to public amenity in the area and will provide valuable ecosystem services. Existing trees will influence developable area of site and its capacity. The quality of all existing trees should be assessed against the criteria in table 1 of BS5837:2012 (or its latest iteration). High quality trees must be retained unless there is a robust over-riding policy-based justification. Moderate and low quality trees should be retained where it is feasible to do so. Opportunities exist to plant new trees to benefit public amenity and to enhance the street scene along Abingdon Road and cycle track	
Are land contamination issues likely?	Road and cycle track. Yes	
Does the site adjoin a sensitive land use? Is there an adjoining land use that may cause disturbance or environmental issues such as noise or smells?	No but consideration needs to be given about views into the site from Iffley village	

Stage 2 conclusion
Notice and the secretariate Continue to Co
No insurmountable constraints. Continue to Stage 3 Assessment.

Stage 3 assessment – Qualitative assessment of deliverability and consideration of potential sustainability impacts. Identification of preferred options

Is there confirmed landowner intention to develop	Yes
Does the landowner specify types of development	Yes – residential development

Stage 3 conclusion	
Consider further for allocation for housing
