### Policy E3

Q4: The overall principle of this policy is generally supported by Logicor, however there is concern that, whilst these do not equate to issues of soundness, there are issues in relation to the Policy's clarity on certain concepts and definition of particular references.

For example, the Policy would benefit from additional guidance and detail, particularly given the range of employment site types listed within the Policy. Furthermore, additional clarification should be made regarding Footnote 4, specifically in relation to the definition of commercial development and operational needs in relation to the category of employment site that the policy applies to.

The Council, in order for the policy to be acceptable must also be appropriately and robustly justified with sufficient evidence provided to validate its requirements.
