

Appendix 3. Target Notes and Photographs

Survey sites 2025

3.1 Court Place Farm – East (188)

Target note 1. Stand of scrub and trees including abundant Silver birch with frequent Field Maple and Bramble. There is occasional Ash, Alder and Grey Willow with scrub species such as Hazel, English Elm, Dogwood, Guelder-rose, Hawthorn and Blackthorn. The ground flora contains Cock's-foot, Barren Brome, Creeping Thistle, Cleavers and Hogweed.

Target note 2. Species-poor hedgerow dominated by Field Maple and Hawthorn with sparse Wayfaring-tree, Spindle and Dog-rose.

Target note 3. Copse of trees of mostly Field Maple, Ash, Hawthorn, Silver birch with occasional Wild Cherry, Hazel, Crab Apple and Dog-rose. There is a single young Wild Service-tree.

Target note 4. Patch of suckering Blackthorn that has been cut, where an adult Brown Hairstreak butterfly was observed.

Target note 5. An area of secondary woodland with a canopy of frequent Ash and Field Maple and small amounts of Sycamore, Alder and Horse Chestnut. A group of Crack Willow trees occurs at the western end where ground conditions are wetter. Honeysuckle is the notable climber present, and understorey species include frequent Hawthorn, Blackthorn and Hazel with a little Elder, Holly, English Elm and Apple. The ground flora has abundant Common Nettle and Ivy with locally frequent Pendulous Sedge. There is frequent Bramble, Herb-Robert and Bittersweet with occasional herbs such as Hedge Woundwort, Wood Avens, Lords-and-ladies, Creeping Buttercup and Dewberry. Rarely recorded species includes Hogweed, Male-fern, Soft-rush and Field Horsetail.

Target note 6. Boundary trees and scrub comprising frequent tall, semi-mature Ash, Field Maple and Horse Chestnut with occasional Silver Birch and Rowan, and a little Wild Cherry. Scrub species include frequent Hawthorn with occasional Blackthorn and Cherry Plum. The ground flora is limited, mainly dominated by Ivy with frequent Bramble and Wood Avens and sparse Dewberry, Lords-and-ladies and Stinking Iris.

Mown glades of semi-improved grassland

Hedgerow at TN 2 with adjacent area of uncut, rough grassland between hedgerow and scrub

Scrub and trees at TN 1

Trees along northern boundary

Cut Blackthorn scrub at TN 4 where a Brown Hairstreak was recorded

Secondary woodland at TN 5

Boundary trees and scrub at TN 6

3.2 Land off Mill Lane (636)

Target note 1. Amenity grassland used as a sports pitch. It had a short-mown sward with areas of dried grasses at the time of the survey, only a small proportion of which was identifiable. It includes locally abundant perennial rye-grass with cock's-foot, rough meadow-grass, yarrow, ribwort plantain and autumn hawkbit.

Amenity grassland

Target note 2. Semi-improved neutral grassland (Poor). To the west, there is a rougher uncut section of the field. It includes locally abundant false oat-grass and ribwort plantain with frequent autumn hawkbit and yarrow. There is locally frequent cow parsley and creeping bent. Occasional species include soft brome, field bindweed, creeping buttercup, cock's-foot, red clover and rough meadow-grass. There is also a small amount of smooth hawk's-beard, selfheal, hogweed, common ragwort, Timothy, Yorkshire fog, dandelion and common mouse-ear.

Rough grassland to the west

Target note 3. Broadleaved plantation woodland. The small block of woodland at the margin to the northwest has locally abundant lime species trees with some oak, horse chestnut, field maple, elm species and ash. The field layer includes cow parsley, nettle, cleavers, wood avens and ivy.

Target note 4. Hedgerows with trees. The boundary hedges include hawthorn, bramble and dogwood with many trees - field maple, oak, ash, wild cherry, crack willow, lime species and horse chestnut. At the base of the hedge the field layer includes nettle and ivy.

3.3 Land to the rear of Harolde Close (658)

Target note 1. A line of planted wild cherry trees along the northern site edge.

Target note 2. Semi-natural broadleaved secondary woodland including ash, field maple and an area of hazel coppice. To the northwest, the woodland grades to scrub where there is also some willow species (crack willow and goat willow). Other shrubs include hawthorn, elder, guelder-rose, spindle, red currant and field rose. The field layer is variable with sparser areas where shade is heavier. It includes ground ivy, ivy, wood avens, nettle, bramble, false brome, pendulous sedge, wood sedge, bittersweet, male-fern, giant fescue, hairy brome, hedge woundwort and garlic mustard.

Hazel coppice

Semi-natural mixed deciduous woodland

Target note 3. Broadleaved plantation woodland. The canopy includes ash, wild cherry and silver birch. There is also some sycamore, horse chestnut, norway maple and field maple. There are some plantation lines visible but the structure is becoming more semi-natural in places. The understory is variable with varying amounts of hawthorn, hazel, elder and guelder-rose. There are small amounts of holly and rowan. The field layer has abundant ivy with nettle, false brome, red currant, herb Robert, wood avens, cow parsley, hairy brome, ash seedlings, primrose, giant fescue, lord's-and-ladies, hedge woundwort, ground ivy, garlic mustard and bramble.

Target note 4. Semi-improved neutral grassland. Glades and rides have rough grassland with locally abundant great horsetail and nettle with bramble scrub. Grasses include false oat-grass, cock's-foot, creeping bent, Yorkshire fog and common couch. There is locally frequent hairy sedge. Forbs include common ragwort, hogweed, burdock species, germander speedwell, broadleaved dock, great willowherb, hedge woundwort, cleavers, ground ivy, yarrow and spear thistle. There is the climber hedge bindweed.

Rides

Central glade

Target note 5. Scrub. To the west, there is a strip of scrub with willow species (including crack willow and goat willow), elder, bramble and hawthorn. This area of denser vegetation was only partly accessed due to the dense vegetation. Field layer species include ivy, nettle, cow parsley, hogweed, comfrey, hedge woundwort, bittersweet, ground ivy and wood avens. There is the climber hedge bindweed.

Target note 6. Running water. There is a stream to the west side of the site with steep banks. No aquatic or emergent vegetation was seen but the watercourse was only viewed from the top of the bank where access was possible. The banks include abundant ivy with nettle, bramble, bittersweet and hart's tongue fern. Woody species include crack willow, ash, elder and hawthorn.

3.4 Green Belt Land at Cherwell Valley/Old Marston, Oxford City Council (112a2)

Target note 1. Semi-improved neutral grassland (Species-poor). It has a rough, tall sward with abundant false oat-grass. Other species include cock's-foot, Yorkshire fog, creeping bent and field bindweed. There are small amounts of common ragwort, common mouse-ear, yarrow, timothy, nettle, soft brome, creeping cinquefoil, ribwort plantain and hogweed. Locally, the grassland towards the scrub margin to the west is slightly more diverse including locally abundant black knapweed.

Target note 2. Semi-improved neutral grassland (Species-poor). This is similar to the grassland described for TN1 but has abundant creeping thistle.

Target note 3. Marshy grassland. Lower lying damper areas of the field have locally abundant hairy sedge, silverweed and creeping bent. There are patches with abundant water mint, frequent Yorkshire fog and occasional tufted hair-grass. The dampest patches include common spike rush. There are small amounts of other species including lesser pond-sedge, greater pond-sedge, false fox-sedge, great willowherb, meadow foxtail, amphibious bistort, hard rush, creeping buttercup, meadow buttercup, meadow vetchling, creeping cinquefoil, yarrow and red clover. One patch of common fleabane was recorded and there were four unidentifiable orchid spikes (at approximately SP51978 09279).

Lower lying damp grassland/sedge

Orchid spike

Area with locally abundant water mint and silverweed

Target note 4. Scrub with scattered trees. It includes abundant hybrid crack willow with ash, poplar species, aspen, wild cherry, hawthorn, dogwood, buckthorn, elm species and bramble. To the south, there are four veteran poplar trees with features including rotten heartwood, lost crowns, split trunks, large lost branches, rot holes and insect boring. There is a footpath through the scrub with grassland margins. These include false oat-grass, sweet vernal-grass, red clover, meadow foxtail, hoary ragwort, mugwort, lesser burdock, greater burdock, broad-leaved dock, yarrow and black horehound. There are some large anthills in the grassland areas.

Scrub with grassland path

Veteran poplar trees

Target note 5. Scrub. The northwest field corner has bramble scrub with some hazel, elder, hawthorn, blackthorn, ash and crack willow.

Target note 6. Semi-improved neutral grassland (Species-poor) with scattered scrub (mainly hawthorn). The scrub becomes denser to the east side of the field. It also includes some blackthorn, bramble and rose species. The grassland sward is tall and rough. It has abundant false oat grass with creeping bent, cock's-foot and red fescue. There are smaller amounts of tufted hair-grass, sweet vernal-grass, common couch and meadow foxtail. Forbs include locally frequent creeping thistle and field bindweed with occasional common sorrel, selfheal, ribwort plantain, meadow vetchling, yarrow, curled dock, oxeye daisy, marsh ragwort and hogweed. There are small amounts of other forbs including common bird's-foot-trefoil, agrimony, meadowsweet, red clover, germander speedwell, wild carrot, smooth hawk's-beard, common meadow-rue, field scabious and black knapweed. There are some large anthills in the grassland.

Grassland with scattered scrub

More frequent scrub to east

Target note 7. Hedgerow. Hedgerows include field maple, blackthorn, elder, dog rose, hazel and hawthorn with trees including ash, oak, and field maple. It includes a few large hazel coppice stools. The field layer at the base of the hedge includes ivy, cleavers, garlic mustard, wood avens, herb Robert, ground ivy and nettle.

Target note 8. Marshy grassland. The field slopes down on the western side and the bank includes so sections of wetland vegetation indicating possible springs/wet seepages. The main section (SP51854 09456) has areas of abundant hairy sedge with brown sedge, water mint, glaucous sedge, common fleabane, false fox sedge, wild angelica, creeping thistle, valerian species and meadow vetchling.

Target note 9. Marshy grassland. There are other smaller damper patches with abundant sedges including greater pond-sedge (including at SP51812 09473) and glaucous sedge.

Target note 10. Marshy grassland with 30+ orchid flower spikes (unidentifiable this late in the season) mainly around SP51869 09454.

Target note 11. Broadleaved plantation woodland. The small block of broadleaved plantation woodland to the southeast includes ash, oak and field maple. Shrubs include occasional hawthorn. The field layer is poorly developed with much bare ground but includes small amounts of ivy, ground ivy and garlic mustard.

Target note 12. Improved grassland. At the northeast corner of the site, there is an area of uneven ground with abundant nettles.

Target note 13. Veteran ash tree.

3.5 Land at Old Marston (112b2-6)

Target note 1. Semi-improved neutral grassland on ridge and furrow. It was short mown at the time of the survey. It includes locally abundant perennial rye-grass and creeping bent with Yorkshire fog and cock's-foot. Other grasses include red fescue, and at margins false oatgrass. There is also some hairy sedge. Forbs include locally frequent common sorrel and occasional lady's bedstraw, ribwort plantain, creeping cinquefoil, field bindweed, red clover and broad-leaved dock. There is also a small amount of creeping thistle, spear thistle, cut-leaved crane's-bill, autumn hawkbit, creeping buttercup, yarrow, dandelion, cat's-ear and black knapweed.

Target note 2. Native hedgerow. The field boundaries have native hedgerows with hawthorn, blackthorn, field maple, elm species, hazel, apple, bramble, elder, dogwood, oak and ash.

Target note 3. Semi-improved neutral grassland. The sward is similar to that described for TN4 but also has locally frequent black knapweed.

Target note 4. Semi-improved neutral grassland. This large, flat field had a short-mown sward at the time of the survey. It had vegetation that was crisped, limiting what could be identified so additional species are likely to be present. Grasses include cock's-foot, crested dog's-tail, creeping bent and perennial ryegrass with red fescue and false oat grass. Forbs include locally abundant creeping buttercup with locally frequent yarrow, ribwort plantain and field bindweed. There is occasional common sorrel, red clover, amphibious bistort and smooth hawk's-beard with small amounts of cat's-ear, common bird's-foot-trefoil, lady's bedstraw, hoary ragwort, autumn hawkbit, black knapweed, common mouse-ear, wild carrot, dandelion, common ragwort, goat's-beard, creeping thistle and hogweed. Hedgerows include hawthorn, blackthorn, field maple, ash, elder, hazel, and crack willow.

Target note 5. Improved grassland. There is a lush strip to the north side. It is species poor with perennial ryegrass, creeping bent, cock's-foot and ribwort plantain.

Target note 6. Unimproved neutral grassland. The grassland had been recently cut so could not be fully accessed. It includes Yorkshire fog, cock's-foot, false oat-grass, creeping bent, red fescue and Timothy with some perennial ryegrass, soft brome and meadow fescue. There is also occasional hairy sedge and a small amount of jointed rush. Forbs include locally abundant black knapweed with frequent common sorrel and locally frequent creeping buttercup, red clover and yarrow. There is also occasional meadow vetchling,

common bird's-foot-trefoil, meadow buttercup and smaller amounts of rough hawkbit, common mouse-ear, selfheal, creeping cinquefoil, creeping thistle, great willowherb, broadleaved dock, silverweed, red bartsia and autumn hawkbit. The field is bounded by native hedgerows on three sides. Hedgerows include hawthorn, elder, bramble, ivy, poplar species, field maple, ash trees, hazel, and crack willow.

Target note 7. Unimproved neutral grassland. Grassland bank with a tall uncut sward at the time of the survey. Much of the bank is moderately rich, false oat grass dominated grassland with locally species-rich wetland areas. Rough grass areas include abundant false oatgrass with meadow vetchling, hairy sedge, cock's-foot, tufted hair-grass, sweet vernal-grass, tufted vetch, locally abundant black knapweed, creeping bent, ribwort plantain, common sorrel, common bird's-foot-trefoil, nettle, cleavers, hogweed, silverweed, meadow fescue, wild angelica, autumn hawkbit, Timothy, creeping thistle, yarrow, creeping cinquefoil, lady's bedstraw, creeping buttercup, red bartsia and hard rush.

Target note 8. Swamp. Spring and flush grading to swamp vegetation along a watercourse. Springs and flushes include locally abundant brown sedge and lesser pond-sedge with water mint, floating sweetgrass, creeping bent, wild angelica, common fleabane, silverweed, meadow vetchling, hop, hedge bindweed, glaucous sedge, marsh woundwort, meadowsweet, gypsywort, false fox-sedge, bittersweet, field horsetail, purple loosestrife, square-stalked St. John's-wort, water chickweed, red shanks, skullcap, greater pond-sedge, hard rush, marsh ragwort, marsh valerian, marsh thistle and devil's bit scabious.

Target note 9. Running water. The watercourse channel has abundant reed canary-grass with lesser pond-sedge, bulrush, floating sweetgrass, flag iris and greater pond-sedge. There is also some water dock. The bank includes a small amount of orange balsam. Trees and scrubs include osier and crack willow.

Target note 10. Unimproved neutral grassland grading to swamp on the lower banks. It includes brown sedge, lesser pond-sedge, water mint, creeping bent, wild angelica, common fleabane, silverweed, meadow vetchling, hop, hedge bindweed, glaucous sedge, marsh woundwort, meadowsweet, gypsywort, field horsetail, square-stalked St. John's-wort, red shanks, skullcap, greater pond-sedge, hard rush, marsh ragwort, marsh valerian, marsh thistle and devil's bit scabious.

3.6 Brasenose Land (within Land at Old Marston site) (112c)

Target note 1. Semi-improved neutral grassland. Small grassland field with semi-improved neutral grassland grading to patches of marshy grassland. It has Yorkshire fog, creeping bent and creeping buttercup. There is locally frequent tufted hair-grass, crested dog's-tail, cock's-foot, perennial ryegrass and creeping thistle. There are some patches of hard rush and occasional Timothy, nettle, white clover, hairy sedge, red fescue, rough meadow-grass, meadow foxtail and false oat-grass. Other species include creeping cinquefoil, common mouse-ear, common ragwort, lesser stitchwort, hoary ragwort, silverweed and meadow buttercup. There is some encroaching scrub in the grassland – blackthorn and bramble.

Target note 2. Marshy grassland. It has abundant hard rush, Yorkshire fog and creeping bent with locally frequent tufted hair-grass. Other grasses include meadow foxtail, rough meadowgrass and false oat-grass. Sedges include hairy sedge and false fox sedge, and there is a small amount of soft rush. Forbs include creeping buttercup, water mint, nettle, creeping cinquefoil, lesser stitchwort, hoary ragwort, silverweed and meadow buttercup.

Target note 3. Hedgerow. To the north, there is a section of boundary hedge with hawthorn, ash, English elm, wych elm, field maple, blackthorn, bramble, crack willow, pedunculate oak and small amount of Midland hawthorn. Other field boundaries have wider sections of scrub or scattered trees and shrubs.

Target note 4. Scrub. Along the southern boundary and in a wider block to the west side of the field, there is scrub. Scrub includes blackthorn, bramble, elm species, pedunculate oak, hawthorn, elder and wild plum. The field layer is poor with leaf litter and small amounts of hedge woundwort, lord's-and-ladies, bramble, ivy and nettle.

Target note 5. Semi-improved neutral grassland on ridge and furrow. This damp grassland field had been grazed at the time of the survey, but a reasonable proportion of the vegetation present was still identifiable. It includes Yorkshire fog, creeping bent and creeping buttercup with red clover, creeping cinquefoil, hard rush and crested dog's-tail. There is locally abundant creeping thistle. Other grasses include perennial rye-grass, Timothy, soft brome, meadow barley, sweet vernal grass, red fescue, cock's-foot, tufted hairgrass, tall fescue and meadow foxtail. There is occasional hairy sedge and a small amount of greater pond-sedge. Other forbs include dandelion, white clover, common sorrel, dock species, common bird's-foot-trefoil, lesser stitchwort, meadow vetchling, common mouse-ear, field bindweed, common cat's-ear, selfheal, pepper saxifrage, meadow buttercup, and other ragwort species. A small amount of strawberry clover was also recorded.

Target note 6. Hedges include hawthorn, blackthorn, elm species, bramble, field maple, goat willow and ash trees. There is a veteran ash tree in the hedge to the north.

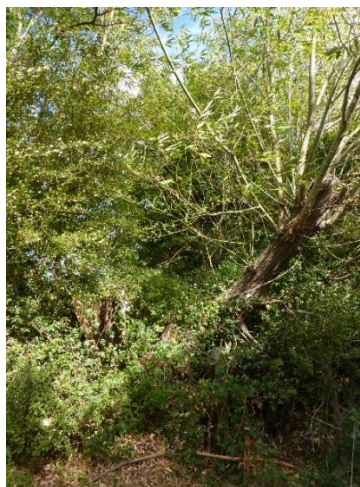

Target note 7. A small section of hardstanding between fields with boundary hedgerows.

Section of hardstanding between Fields 2 and 3

Veteran crack willow pollard in hedgerow

Target note 8. Semi-improved neutral grassland on ridge and furrow. It has Yorkshire fog, crested dog's-tail, creeping bent, creeping cinquefoil and hairy sedge with frequent hard rush, creeping buttercup and red clover. Other grasses include tufted hair-grass, cock's-foot, tall fescue, red fescue, meadow fescue, perennial ryegrass, Timothy and sweet vernal grass. There is a small amount of greater pond-sedge. Other forbs include locally frequent common bird's-foot-trefoil and creeping thistle with occasional meadow buttercup. There is also a small amount of greater plantain, yarrow, ragwort, ribwort plantain, common mouse-ear, pepper saxifrage, common cat's-ear, selfheal, silverweed, tufted vetch, common sorrel, field bindweed and meadow vetchling.

Target note 9. Site boundary west. There is no visible feature here in the field.

Target note 10. Hedgerow with trees. Hedges include oak, crack willow and ash trees. There is also hawthorn, blackthorn, bramble, apple, field maple, elm species and poplar species. The southern and eastern hedges have associated ditches.

Target note 11. Willow scrub including some large collapsing crack willow. There is a small block of woodland at the southeast corner. It includes veteran willow pollards and ash. Other woody species include hawthorn and crab apple. The field layer is shaded and includes areas of bare ground but also nettle, rough meadow-

grass, wood avens, herb Robert, giant fescue, ivy, wood dock and garlic mustard. There is also a small amount of lord's-and-ladies, broadleaved dock and remote sedge.

Target note 12. Seasonal pond. A small pond that was dry at the time of the visit but appears to hold water for at least part of the year. It is heavily shaded by the surrounding trees and scrub and includes many fallen dead branches. No aquatic, marginal or emergent wetland species were recorded. The banks had vegetation as described for TN 11.

Target note 13. Semi-improved neutral grassland with some scattered scrub. The scrub includes bramble, hawthorn and blackthorn. The field has ridge and furrow to the east but this becomes less clear to the west. The grassland has creeping bent, Yorkshire fog, crested dog's-tail, tufted hair-grass, hard rush, creeping buttercup and creeping cinquefoil. There is locally frequent creeping thistle, cock's-foot, red fescue and tall fescue. Other grasses include occasional perennial rye-grass, sweet vernal grass and meadow foxtail with smaller amounts of false oat-grass and soft brome. There is occasional hairy sedge and smaller amounts of false fox sedge and field horsetail. Other forbs include common bird's-foot-trefoil, red clover, ribwort plantain, pepper saxifrage, common sorrel, meadow buttercup, meadow vetchling, ragwort, silverweed, hogweed, white clover, selfheal and black knapweed.

Target note 14. Scrub. This is the location of a pond shown on ordnance survey mapping. There may be a pond here but any view was obscured by dense scrub.

Dense bramble at approximate locations shown as ponds on Ordnance survey mapping

Target note 15. Semi-improved neutral grassland. This is the location of a pond shown on ordnance survey mapping. There is a small depression here so it may be seasonally wet but the vegetation appears very similar to the surrounding grassland.

Scoping sites 2025

3.7 Wildlife Corridor at River Cherwell (136)

Target note 1. Amenity grassland. Sports pitch with short mown grassland

Target note 2. Amenity grassland. Short mown grassland along the site edges adjacent to the river.

Target note 3. Hedgerow. Short clipped hedge as shown in the photograph for TN2. Closer inspection would be required to determine its composition.

Target note 4. Broadleaved plantation woodland. To the west side of the site, there is a strip of broadleaved woodland. It has abundant sycamore with ash and some Lombardy poplar, wild cherry, horse chestnut and younger pedunculate oak. The understory is open and the field layer appears poorly developed with a large section with exercise/play apparatus installed. Other areas include bare leaf litter and some grassy sections and some ivy but these were not closely inspected.

3.8 Banbury Road North Sports Club (166)

Target note 1. Built up areas. Artificial surface sports pitch

Artificial pitches

Target note 2. Amenity grassland. Frequently mown sports pitch/courts and marginal strips. Amenity grassland areas are dominated by grass species including perennial ryegrass with cock's-foot, smooth meadow grass with smaller amounts of rough meadow-grass, wall barley and creeping bent. The sward is generally dominated by grasses, with a slightly wider range of species at the site edges. Forbs include greater plantain, ribwort plantain, creeping cinquefoil, white clover, dandelion, smooth hawk's-beard, daisy and common mouse-ear. To the southeast, autumn hawkbit is locally abundant. At the site edges, there are also small amounts of cow parsley, spear thistle, hogweed, hedge woundwort, ground ivy, common ragwort, nettle, nipplewort, wood avens, garlic mustard, cat's-ear and yarrow. The corners of the amenity grass courts include small patches of ornamental planting including begonias, pot marigold, aquilegia and opium poppy.

Amenity grass courts

Marginal grassland

Target note 3. A short section of species poor native hedge. This section of internal hedge has hawthorn with small amount of ash and elder.

Target note 4. A short section of species poor native hedge with trees. It includes hawthorn, field maple, elder and bramble. Climbers include ivy, white bryony and bittersweet. To the southeast corner, trees include ash and Lombardy poplar.

Target note 5. Line of trees. A line of conifers with some deciduous trees towards to the east end. This is a line of Scot's pine trees. To the east, there are some deciduous trees including moderately large horse chestnut and lime species.

Target note 6. Built up areas. Buildings and car park

Target note 7. Species rich hedgerow. It comprises mainly native species but also including some ornamental garden planting. Species include hawthorn, holly, bramble, beech, blackthorn, sycamore, snowberry, yew and other conifers.

Target note 8. Hedgerow. Boundary line of woody species. This appears to be mainly conifer but it was not closely inspected.

Target note 9. Species poor native hedgerow. The hedge to the east is mainly hawthorn with elder and bramble. At the base of the hedge, field layer species include ivy, nettle and bittersweet.

3.9 Boults Lane Recreation Ground (178)

3.10 Court Place Farm – West (189)

Amenity grassland areas

Main wetland area along southern margin

Marsh-mallow

Smaller wetland area and pond in the south-eastern corner of the site

Boundary trees along the western and northern borders

Buildings and hardstanding to the west of the site

3.11 Cricket pitch Cutteslowe Park (194)

Target note 1. Amenity grassland. It is dominated by grasses including perennial ryegrass with other species including smooth meadow-grass, cock's-foot and Timothy. Rougher grassland toward the northern and eastern margins includes false oat-grass, sterile brome, cow parsley, hogweed, garlic mustard, autumn hawkbit, smooth hawk's-beard, nettle, curled dock, germander speedwell, Timothy and wood avens.

Target note 2. Built up areas. The car park area to the west has an artificial surface with some vegetation including perennial rye-grass, greater plantain, white clover, dandelion and pineapple weed.

Target note 3. Double line of planted trees. Trees to the west include Japanese larch, Norway spruce, cedar species, wild cherry. Shrubs include some ornamental species and elder. Field layer includes ivy, bramble, ground ivy and wood avens.

Target note 4. Species poor hedgerows. Boundary hedges to the north and west have a ditch. They include hawthorn, blackthorn, field maple, horse chestnut, dog rose, elder and ash. There is also ivy, black bryony and bramble.

Northern hedgerow

Eastern hedgerow

3.12 Oriel College Sports Ground (665)

Target note 1. Amenity grassland sports pitch with a short frequently mown sward. There are some recently re-seeded sections that were seen from the edges only but appeared similar in composition. There is locally abundant perennial rye-grass with red fescue, cock's-foot, creeping bent and Yorkshire fog. The grassland is grass-dominated with low abundance of forbs but they include locally frequent yarrow and white clover with rare greater plantain, ribwort plantain, red clover, daisy, broadleaved dock, knotgrass, thyme-leaved speedwell, black medick, common mouse-ear, nettle and creeping thistle. There is also a small amount of hairy sedge. The margins also include a small amount of false oatgrass, tall fescue, comfrey species and great horsetail.

Target note 2. Built up areas. Buildings and driveway

Target note 3. Boundary hedgerow to the east. It is species poor with many trees. It has field maple, blackthorn, hawthorn and bramble. Trees include field maple and sycamore.

Target note 4. Semi-improved neutral grassland strip towards the northern field edge. Close to the woodland margin the grassland slightly richer in species composition with locally frequent common bird's-foot-trefoil and small amounts of common cat's-ear, meadow vetchling, selfheal and smooth hawk's-beard.

Target note 5. Woodland margin to the north. At the margin with the broadleaved semi-natural woodland, there is locally abundant great horsetail and bramble with hairy sedge, hard rush, ivy, false oatgrass, nettle, cleavers, hedge woundwort, stinking iris and pendulous sedge. Woody species include sycamore, crack willow, elm species, goat willow, pedunculate oak, apple, blackthorn and hawthorn.

3.13 Bartlemas former Bowling Green (204)

Target note 1. Amenity grassland. A small amenity grassland field with a short-mown sward, and strips of rougher marginal grassland to the south. It includes abundant red fescue with cock's-foot, perennial rye-grass, Yorkshire fog and creeping bent. Forbs include locally abundant creeping thistle, locally frequent yarrow and knotgrass, occasional smooth hawk's-beard and small amounts of white clover, red clover, black medick, germander speedwell, creeping buttercup, ribwort plantain, field bindweed, dandelion and creeping cinquefoil.

Target note 2. Semi-improved neutral grassland. There are rougher marginal strips of grassland to the south and east sides of the field. These include thistle, aster species, nettle, false oatgrass, mugwort, ragwort, buddleia, cow parley, bramble and some suckering elm.

Target note 3. Species poor native hedgerow. The field boundaries have hedges with locally abundant elm species, blackthorn and privet. There is also a small amount of elder, hawthorn, horse chestnut, spindle, ash and oak. The field layer at the base of the hedge includes bramble, nettle, garlic mustard and ivy. There is also sterile brome, black horehound and nipplewort.

<i>Polygonum aviculare</i>	Knotgrass	R	Brasenose Fields, Marston	<Null>	Higher Plants - Flowering Plants
<i>Populus</i>	Poplar species	R	Brasenose Fields, Marston	<Null>	Higher Plants - Flowering Plants
<i>Potentilla anserina</i>	Silverweed	O	Brasenose Fields, Marston	<Null>	Higher Plants - Flowering Plants
<i>Potentilla reptans</i>	Creeping cinquefoil	LA	Brasenose Fields, Marston	<Null>	Higher Plants - Flowering Plants
<i>Prunella vulgaris</i>	Selfheal	R	Brasenose Fields, Marston	<Null>	Higher Plants - Flowering Plants
<i>Prunus spinosa</i>	Blackthorn	LF	Brasenose Fields, Marston	<Null>	Higher Plants - Flowering Plants
<i>Quercus robur</i>	Pedunculate Oak	R	Brasenose Fields, Marston	<Null>	Higher Plants - Flowering Plants
<i>Ranunculus acris</i>	Meadow Buttercup	R	Brasenose Fields, Marston	<Null>	Higher Plants - Flowering Plants
<i>Ranunculus repens</i>	Creeping buttercup	LA	Brasenose Fields, Marston	<Null>	Higher Plants - Flowering Plants
<i>Rosa arvensis</i>	Field-rose	R	Brasenose Fields, Marston	<Null>	Higher Plants - Flowering Plants
<i>Rosa canina</i>	A Flowering Plant	R	Brasenose Fields, Marston	<Null>	Higher Plants - Flowering Plants
<i>Rubus fruticosus</i>	Bramble	LA	Brasenose Fields, Marston	<Null>	Higher Plants - Flowering Plants
<i>Rumex acetosa</i>	Common Sorrel	LF	Brasenose Fields, Marston	<Null>	Higher Plants - Flowering Plants
<i>Rumex conglomeratus</i>	Clustered Dock	O	Brasenose Fields, Marston	<Null>	Higher Plants - Flowering Plants
<i>Rumex crispus</i>	Curled Dock	O	Brasenose Fields, Marston	<Null>	Higher Plants - Flowering Plants

Oxford City Biodiversity Surveys 2025

Taxon Name	Common Name	Abund- ance	Location	Comments	Taxon Group
<i>Rumex obtusifolius</i>	Broad-leaved dock	R	Brasenose Fields, Marston	<Null>	Higher Plants - Flowering Plants
<i>Rumex sanguineus</i>	Wood dock	R	Brasenose Fields, Marston	<Null>	Higher Plants - Flowering Plants
<i>Salix caprea</i>	Goat willow	R	Brasenose Fields, Marston	<Null>	Higher Plants - Flowering Plants
<i>Salix fragilis</i>	Crack-willow	LF	Brasenose Fields, Marston	<Null>	Higher Plants - Flowering Plants
<i>Schedonorus arundinaceus</i>	Tall fescue	O	Brasenose Fields, Marston	<Null>	Higher Plants - Flowering Plants
<i>Schedonorus pratensis</i>	Meadow fescue	R	Brasenose Fields, Marston	<Null>	Higher Plants - Flowering Plants
<i>Stachys sylvatica</i>	Hedge woundwort	R	Brasenose Fields, Marston	<Null>	Higher Plants - Flowering Plants
<i>Stellaria graminea</i>	Lesser Stitchwort	R	Brasenose Fields, Marston	<Null>	Higher Plants - Flowering Plants
<i>Stellaria media</i>	Common chickweed	R	Brasenose Fields, Marston	<Null>	Higher Plants - Flowering Plants
<i>Taraxacum officinale</i> agg.	Dandelion	R	Brasenose Fields, Marston	<Null>	Higher Plants - Flowering Plants
<i>Trifolium fragiferum</i>	Strawberry Clover	R	Brasenose Fields, Marston	<Null>	Higher Plants - Flowering Plants
<i>Trifolium pratense</i>	Red clover	O	Brasenose Fields, Marston	<Null>	Higher Plants - Flowering Plants
<i>Trifolium repens</i>	White clover	R	Brasenose Fields, Marston	<Null>	Higher Plants - Flowering Plants
<i>Ulmus</i>	Elm species	O	Brasenose Fields, Marston	<Null>	Higher Plants - Flowering Plants
<i>Ulmus glabra</i>	Wych Elm	Present	Brasenose Fields, Marston	<Null>	Higher Plants - Flowering Plants
<i>Ulmus procera</i>	English elm	Present	Brasenose Fields, Marston	<Null>	Higher Plants - Flowering Plants
<i>Urtica dioica</i>	Common Nettle	R	Brasenose Fields, Marston	<Null>	Higher Plants - Flowering Plants
<i>Vicia cracca</i>	Tufted vetch	R	Brasenose Fields, Marston	<Null>	Higher Plants - Flowering Plants
<i>Equisetum arvense</i>	Field horsetail	R	Brasenose Fields, Marston	<Null>	Higher Plants - Horsetails
<i>Maniola jurtina</i>	Meadow brown	5	Brasenose Fields, Marston	<Null>	Invertebrates - Butterflies
<i>Pieris rapae</i>	Small white	1	Brasenose Fields, Marston	<Null>	Invertebrates - Butterflies
<i>Polyommatus icarus</i>	Common blue	2	Brasenose Fields, Marston	<Null>	Invertebrates - Butterflies
