

# Improvements to all blocks of flats starting with Stowford and Bayswater Roads

www.oxford.gov.uk

We are making a variety of improvements to the outside of all blocks of flats over the next four years, and will ensure they are in good repair. This will vary from block to block, depending on need, existing issues and residents' views. We will also improve the internal communal areas and clear up the street environment.

## We also plan to:

- Improve security and reduce anti-social behaviour
- Carry out landscaping around the blocks of flats
- Increase residential car parking where possible, and
- Make better use of communal areas

In April 2016 residents were consulted on the improvements to blocks on **STOWFORD ROAD** and **BAYSWATER ROAD**. We spoke to 81% of the residents of these blocks and from that feedback, 92% of the respondents were in favour of the proposed works.

## Planned works include:

- Demolition of drying areas and bin stores
- Rendering of entrance porches
- Installation of metal looped fence to define boundaries
- Improvement of paths
- Relocation of bin and storage sheds
- Planting of shrubs and hedging

We will consult with the residents of each block before any planned works take place.

2-26 Stowford Road

55-89 Bayswater Road

## General timetable

2016/2017

55-89 (odd) Bayswater Road  
2-60 (even) Stowford Road
